EDUCATION

Oct 2023 – Sept 2025 **Master of Applied Data Science and Analytics**
SRH Hochschule – Heidelberg, Germany
GPA: 2.0 (1 being highest)

June 2015 – May 2018 **Bachelor of Science - Information Technology**
Bhavan's College – Mumbai, India
GPA: 6.2 (10 being highest)

PROFESSIONAL EXPERIENCE

Jan 2026 – June 2026 **Freelance – Data Analyst**

- Built an opponent tactical analysis system for Premier League & 2. Bundesliga teams, ingesting Opta/TRACAB and Sportec tracking & event data into PostgreSQL
- Cleaned, standardized and synchronized tracking/event data from multiple providers, resolving data quality issues pre-ingestion.
- Developed tracking data-based defensive shape detection classifying opponent back-3/4/5 per match, detecting block depth from backline height, and measuring team compactness (x/y-spread) split by ball zone (central, half-space, wide) output as pitch visualisations for coaching staff.
- Closely collaborate with Match analyst to share the results and outputs in BI Dashboards.

May 2019 – Jul 2022 **Aditya Birla Sun Life AMC Limited – Mumbai, India**
Assistant Manager (Data Analyst) – Business Development/Transaction Processing

- Gathered business requirements from stakeholders and translated them into BI dashboard and BI reports, collecting and analysing data to surface trends and insights.
- Prepared interactive Power BI dashboards to communicate KPIs and sales metrics to stakeholders.
- Wrote and optimized SQL queries to extract and analyse campaign and transaction data from multiple source systems, developing strategic reporting solutions that contributed to 20% growth in AUM.
- Segmented customers by monthly SIP investment behavior to enable targeted campaign strategies

Aug 2018 – Mar 2019 **HUDL – Mumbai, India**
Sports Analyst

- Analyzed various sports data, including Football, American Football, Basketball, Volleyball, and Lacrosse.
- Performed event tagging for 40+ football matches using Wyscout.

ACADEMIC PROJECTS

Apr 2025 – Sept 2025 **Master's Thesis – SRH Hochschule Heidelberg [View Project]**
Deep Learning-based Formation Detection and GNN-driven Tactical Decision Support System for Football Analytics

- Built a football analytics system integrating tracking and event data (TRACAB, Metrica, PFF, Statsbomb) into PostgreSQL.
- Implemented a ResNet-18 model to label phases of play and team formations, manually annotating 5,000 samples and achieving 94% accuracy.
- Designed a formation detection layer using Wasserstein distance and Hungarian assignment, developing tactical metrics (xG, xT, PPDA, possession %, recovery time).
- Engineered a GATv2-based tactical recommendation layer for counter-strategy suggestions, delivered through an interactive Flask dashboard.

Lyft Bikeshare Data Streaming Pipeline

- Developed a big data pipeline for streaming processing and visualizing bike-share data.
- Automated data retrieval using Google Cloud Scheduler, Cloud Functions and Pub/Sub. Managed stream processing and aggregation with Dataflow, storing data in BigQuery.
- Built dashboards in Looker Studio for real-time bike station availability lookup.

Weather and DB Delay Data Pipeline

- Developed and automated a data pipeline using Apache Airflow to fetch real-time weather data every 5 minutes and process historical train delay data with over 1M rows.
- Implemented data cleaning and transformation using PySpark and dbt (removing unnecessary columns, parsing timestamps).

SKILLS

<i>Programming</i>	Python
<i>Database & Cloud</i>	SQL (PostgreSQL, MySQL), Google Cloud Platform
<i>Analytics & BI</i>	Power BI (DAX, Functions, Data Modelling), Tableau, Looker Studio
<i>Machine Learning & AI</i>	Supervised/Unsupervised ML, Anomaly Detection, Time Series Forecasting, Predictive Modelling
<i>Other Tools</i>	Git/GitHub, Microsoft 365, Stream lit, Flask

LANGUAGE SKILLS

<i>English</i>	C1
<i>German</i>	B1

HOBBIES

Football - Bundesliga Mannheim B2, Trekking, Board games
