Goals Conceded

346

Shots Conceded

38

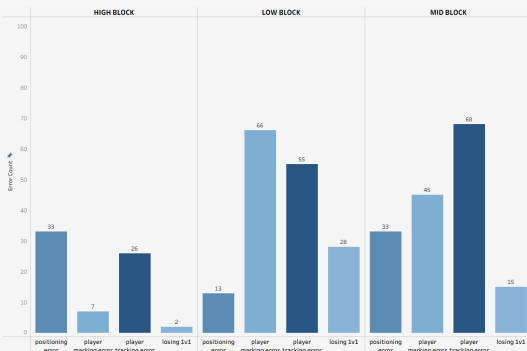

Big Chances Missed

38%

Goal Conversion Rate

DEFENSIVE ERRORS BY BLOCK TYPE

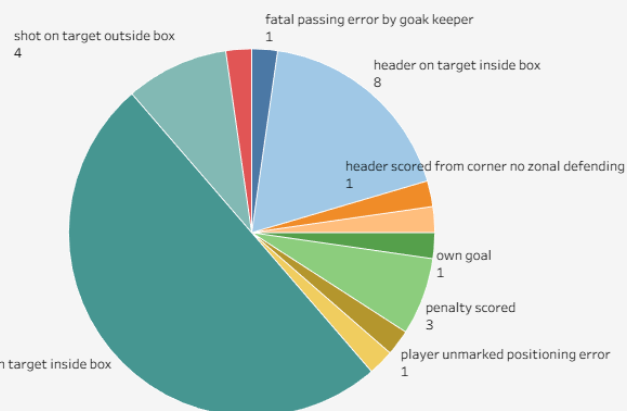

Player tracking and marking Consits **42%** of all defensive errors regardless of which block we defend in, losing runners is the season's single biggest defensive weakness.

DEFENSIVE PROBLEMS

HOW GOALS WERE CONCEDED?

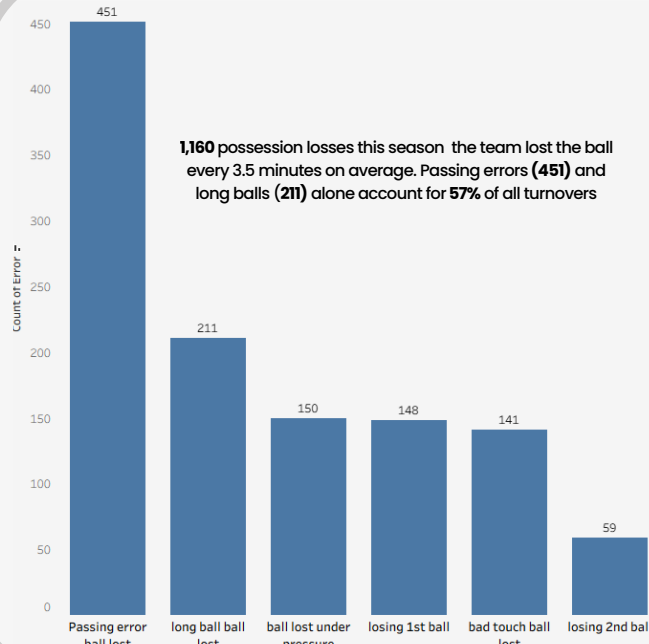

44 GOALS CONCEDED ACROSS 34 MATCHES (1.3 PER MATCH) — 73% CAME FROM INSIDE THE BOX (32/44). WITH SHOTS ON TARGET, THE DOMINANT CAUSE WAS IN 20 OF 34 MATCHES.

OFFENSIVE PROBLEMS

WHERE POSSESSION BREAKS DOWN?

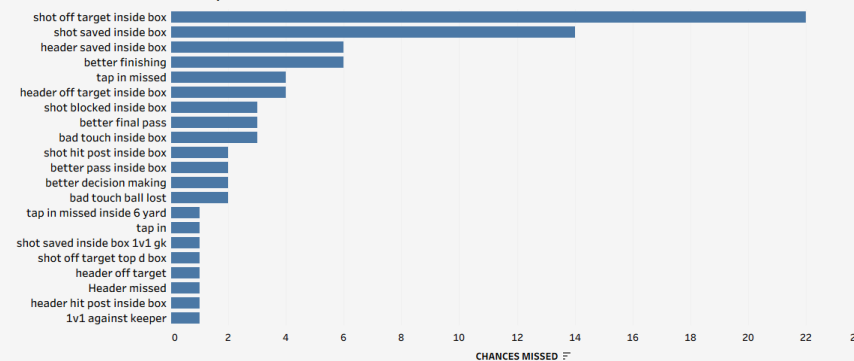

1,160 possession losses this season the team lost the ball every 3.5 minutes on average. Passing errors (**451**) and long balls (**211**) alone account for **57%** of all turnovers

THE CHANCES WE DIDN'T TAKE

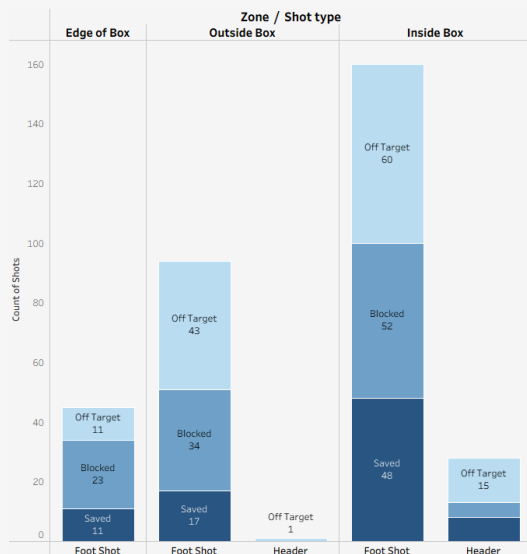

77 chances missed across 34 matches (2.3/match), 36 from inside the box went off target or were saved, meaning the team consistently got into the right positions but failed at the final moment.

We created the chances — we just didn't take them

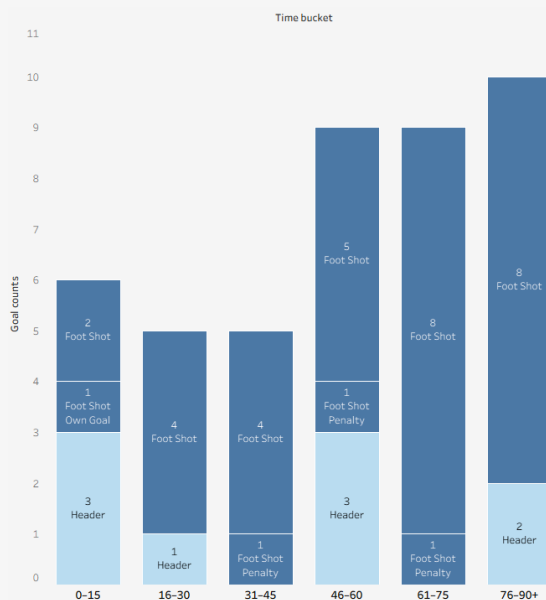

SHOT THREAT BY ZONE & TYPE

346 shots conceded across 34 matches (10.2/match), **55%** from inside the box (192/346). Foot shots dominate in everyzone, but headers inside the box carry the highest conversion risk.

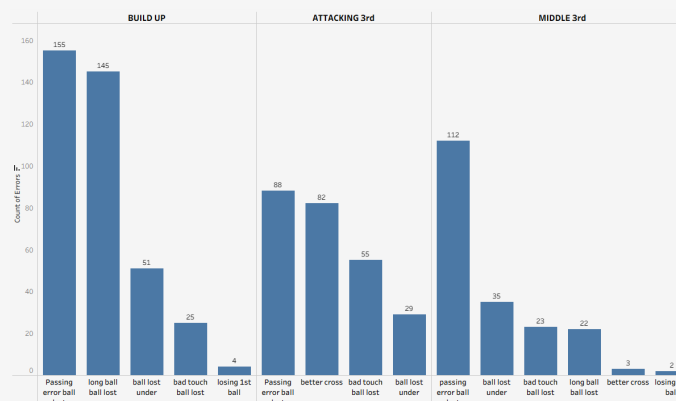

WHEN GOALS WERE CONCEDED?

61% Goals came in the second half (27/44). Goals increase every 15 minutes as the match progresses, peaking at 76–90+ with 10 goals a clear fatigue and concentration pattern.

WHERE ATTACKS BREAK DOWN?

The team **lost possession 831 times** across all 3 zones Build-up (380) alone accounts for **46%** of all losses, but 82 "better cross" entries in the At tacking 3rd reveal the final delivery is equally broken.

OFFENSIVE CORNER ANALYSIS

146 corners won, 4.3 per match. **One goal scored. 52 corners (34%)** had no box movement before delivery. The team earns set pieces consistently but fails to threaten them.
